Message from the State Executive Director

Welcome to the Montana State Farm Service Agency (FSA) website. FSA assists Montanas farmers and ranchers in preserving and promoting agriculture within Montana.

Best Wishes,
Randy Johnson

Online Services

For your convenience we have provided several services online. If you are new to the site and would like to obtain a USDA Service Center Customer ID and password, please **Register** now. Several online services do not require an ID and password.

USDA eAuthentication is the system used by USDA agencies to enable customers to obtain accounts that will allow them to access USDA Web applications and services via the Internet. This includes things such as submitting forms electronically, completing surveys online, and checking the status of your USDA accounts.

Please note that USDA will only accept eAuthentication Accounts from individuals.

Currently USDA eAuthentication does not have the mechanism to issue accounts to businesses, corporations or other entities.

To apply for a USDA eAuthentication Account, please visit the [Create An Account Page](#).

eForms

Why go down to your local service center - go here to find the forms you need and submit them electronically.

What is the USDA Customer Statement? [More](#)

Take a Tour of the Customer Statement! (Demonstration)

The USDA Customer Statement is part of the USDA's eGovernment Initiative and brings to the farmer and rancher un-precedented online access to their business activities with USDA 24 hours a day, 7 days a week.

The Customer Statement, "will put a whole range of USDA services and programs into a single report at the fingertips of agricultural producers." The Customer Statement allows USDA customers to view:

- their participation, application and payment status in various commodity and conservation programs,
- information on farm loans, and
- conservation plan and land unit information.

For an overview of the Customer Statement, see the **Customer Statement Guide for First Time Users**. (PDF format - File Size: 392 KB)

How do I Access the Customer Statement?

Access to the Customer Statement is available to all USDA customers. In order to insure personal identity, you must first register for a **USDA eAuthentication Level 2 Account**. This process is easy and starts online by creating a user ID and password and confirming your email. The final step requires visiting a local USDA Service Center to complete the eAuthentication process.

Once you have your eAuthentication account, you can click on the 'Login' link on the top of this page and enter your user ID and password on the USDA login screen. On your first visit to the customer statement, you will be assigned a unique Customer Identifier (USDA ID) and a default profile for your customer statement will be created. In the future this profile will allow you to customize your statement.

About your USDA ID | Cats- 4545

- The USDA ID is a unique USDA Customer Identifier that over time will be linked to many USDA Agency databases to facilitate communication and doing business with USDA and our USDA partners. While the USDA ID is unique, it is not intended to be sensitive or confidential.
- When beginning to do business with a USDA agency or participating in a new USDA program, you should provide this USDA Customer Identifier. If the agency/program records your USDA ID, the information from that program can be accessed through your eAuthentication Account.
- In the future, if you want to grant permission in a USDA online system for another USDA customer (spouse, employee, partner, bank loan officer, etc.) to be able to view your data, you will need to enter that person's USDA ID on an appropriate screen. The USDA ID provides a means for you to identify a USDA customer without having to ask for personal information such as Social Security Number or Tax ID number.
- If your USDA Customer Identifier is attached to a particular agency or program, changes you make online to your personal data (name, address, phone number, email address, etc.) using the Customer Statement site, can be automatically communicated to all attached systems.
